

AMSPIN SPINDLE

oils are premium rust and oxidation inhibited circulating fluids formulated using specially selected additives. These fluids provide exceptional protection against rust and corrosion and have superior resistance to oxidation in applications where sustained high temperatures are encountered.

APPLICATIONS

All systems calling for Rust & Oxidation type fluid. They are suitable for the lubrication of high speed rotating equipment and high speed spindles, pumps and bearings. They are the correct choice for systems that cannot use typical anti-wear fluids or equipment containing silver lined hybrid bearing.

TYPICAL PHYSICAL CHARACTERISTICS

| ISO Grade | 10 | 22 |
|--------------------|-----------|-------|
| Specific Gravity | .85 | .85 |
| Flash Point, °F | 275 | 365 |
| Oxidation Life | | 7000+ |
| Product Shelf Life | 12 months | |

| Viscosity | | |
|-----------------|------|------|
| SUS @ 100°F | 61.5 | 119 |
| SUS @ 210°F | 35 | 40.6 |
| cSt @ 40°C | 0.03 | 3 |
| cSt @ 100°C | .61 | .5 |
| Viscosity Index | 02 | 02 |
